INTEGRATED LOGISTICS SUPPORT (ILS)

Integrated Logistics Support (ILS) is a methodology for Asset Management and Support, with the aim of ensuring the required availability of a system at the lowest possible cost. The ILS process runs parallel to the product development process and covers the entire lifecycle of a system. By applying the ILS method early on, unnecessary costs and long-term availability problems can be avoided.

ILS is originally developed for the acquisition, design and maintenance of Defence Materiel, but can be applied in all fields where complex systems are used. The ILS training courses provide insight into the processes, products and tasks for the maintenance of an asset. This starts at the initial requirements through to the disposal of the system.

Target group

- Everyone who works in an organisation that has to deal with the ILS methodology.
- Managers who are responsible for the ILS processes and the management of all parties involved.
- ILS employees who perform ILS-related tasks and provide input for the ILS process on a daily basis.

Enrolment fee

A	ILS Introduction	1 day	€ 925,-
B	ILS Advanced	2 days	€ 1.850,-
A + B	Leergang ILS	3 days	€ 2.600,-

(all prices ex vat)

ILS Introduction

This training deals with the basics of ILS: the Logistics Support Analysis (LSA). During this day, you will gain insight into the ILS processes and its influence on an organisation.

Topics covered include:

- ILS processes
- ILS elements
- The advantage of ILS
- The LSAR database
- Processes in which ILS is important
- Standards and regulations for ILS

ILS Advanced

During this two-day follow-up course, we will elaborate on the topics from the ILS Introduction and look at the components of the ILS plan, among others. After attending this course, you will have in-depth knowledge of the ILS process. To participate in this course, you must have completed the ILS Introduction or have comparable knowledge.

Topics covered include:

- looking further into subjects from ILS Introduction
- the ILS plan
- the importance of ILS for asset owners
- The difference between logistical support and maintenance
- Maintaining ILS elements
- The LSA processes during the design process

ABOUT THE VEREBUS ACADEMY

The Verebus Academy focuses on training for optimal use and maintenance of capital-intensive assets, and for the development of (associated) technical documentation.

Training and courses

The Verebus Academy currently offers the following training and courses:

■ ILS training course

- ILS Introduction
- ILS Advanced

■ S-specifications training course

- SX000i Introduction
- S1000D Introduction
- S1000D for authors
- S1000D for coordinators

■ Reliability Management (i.s.m. het ERC)

- Reliability-centred maintenance level 1
- Reliability-centred maintenance level 2
- FMEA/FMECA
- Quick maintenance

Target group

Participants in our trainings and courses are:

- staff responsible for the deployment of capital-intensive assets
- chief engineers
- managers of maintenance departments
- engineers (from systems engineers to detail engineers)
- managers of engineers
- asset managers
- technical authors

Standards

All training courses comply with the most important historical and recent standards.

■ Tailor-made training

In addition to our regular offer, the Verebus Academy also provides tailor-made training, in which the content and level of the training are adapted to the needs of the organisation. This can range from a short introduction training to an intensive course of several months.

Preliminary knowledge

All training and courses require a minimum of a higher professional education (HBO) level.

To participate in follow-up training courses, we expect you to have attended the introductory training course or to have comparable knowledge.

General

Our training courses are scheduled several times a year. Go to www.verebus.nl/training for our current training calendar or to request a (tailor-made) training course. Or send us an email at academy@verebus.nl.

Leading in Knowledge

The most important asset of Verebus Engineering is the expertise and know-how of our employees. In order to reinforce this unique position, we set up the Verebus Academy to share this relevant and up-to-date knowledge with our clients.

Whether you're looking for a workshop, short training, or longer course. The Verebus Academy is the training partner in the field of ILS, S-specifications, technical documentation and RCM.

Your operation
and maintenance
efficient,
easy & safe

More information? www.verebus.nl/training or academy@verebus.nl

Verebus is a technical service provider with knowledge and experience in the field of asset management and associated documentation services. For owners of complex assets, or their suppliers, we can design the entire maintenance and operation philosophy and provide documentation and instruction.

We make maintenance and operations **efficient** in terms of functionality and money, **easy** through logical and clear instructions and **safe** through correct and understandable information.

You can call on us in all phases of the life cycle of your systems and installations. We are independent and cooperate where necessary with complementary partners on a project basis, tailored to your needs.
