ASD S-SERIES SPECIFICATIONS

The ASD S-series specifications are an important part of Integrated Logistics Support (ILS). These specifications ensure uniformity and compatibility between the various ILS processes.

In addition to an SX000i Introduction on the complete range of S-specs, we offer two specialised S1000D tracks: for authors and for coordinators. From the vast and complex documentation, we have selected the topics we consider most important for these groups.

Target group

- everyone who wants to know more about S-specifications
- (senior) technical authors, coordinators, engineers, project leaders, managers, database managers, etc.

Enrolment fee

SX000i Introduction	0.75 day	€	725,-
S1000D Introduction	0.5 day	€	515,-
S1000D for authors	2 days	€	1.850,-
S1000D for coordinators	2 days	€	1.850,-

(all prices ex vat)

SX000i Introduction

With this module you will learn the context and applications of the different S-specifications. This module is recommended for everyone who wants to get acquainted with the S-series specifications or who is about to start working with these specifications.

Topics covered include:

- ILS processes and SX000i
- the interrelation of the S-specifications
- documentation (S1000D)
- provisioning (S2000M)
- LSA (S3000L)

S1000D Introduction

In the S1000D Introduction training, we will take a look at the history, origin and application of S1000D, and the position of S1000D in the ILS process. After the S1000D Introduction, you can deepen your knowledge in the S1000D for authors or S1000D for coordinators courses.

Topics covered include:

- what is S1000D?
- the benefits of using S1000D
- technical documentation in ILS

S1000D for authors

In this course, especially designed for technical authors, we will start with the basics of S1000D and gradually zoom in on how to use it in practice. To participate in this training, you need to have followed the S1000D Introduction or have comparable knowledge.

Topics covered include:

- business rules
- single-source documenting
- XML-code for S1000D

S1000D for coordinators

This course is aimed at the specific tasks of S1000D coordinators, and covers the processes and decision points in S1000D projects. To participate in this training, you need to have followed the S1000D Introduction or have comparable knowledge.

Topics covered include:

- business rules
- S1000D process and its relation to other processes
- BREX
- DMLR, DM, DMC & ICN
- publications
- applicability

ABOUT THE VEREBUS ACADEMY

The Verebus Academy focuses on training for optimal use and maintenance of capital-intensive assets, and for the development of (associated) technical documentation.

Training and courses

The Verebus Academy currently offers the following training and courses:

■ ILS training course

- ILS Introduction
- ILS Advanced

■ S-specifications training course

- SX000i Introduction
- S1000D Introduction
- S1000D for authors
- S1000D for coordinators

■ Reliability Management (i.s.m. het ERC)

- Reliability-centred maintenance level 1
- Reliability-centred maintenance level 2
- FMEA/FMECA
- Quick maintenance

Target group

Participants in our trainings and courses are:

- staff responsible for the deployment of capital-intensive assets
- chief engineers
- managers of maintenance departments
- engineers (from systems engineers to detail engineers)
- managers of engineers
- asset managers
- technical authors

Standards

All training courses comply with the most important historical and recent standards.

■ Tailor-made training

In addition to our regular offer, the Verebus Academy also provides tailor-made training, in which the content and level of the training are adapted to the needs of the organisation. This can range from a short introduction training to an intensive course of several months.

Preliminary knowledge

All training and courses require a minimum of a higher professional education (HBO) level.

To participate in follow-up training courses, we expect you to have attended the introductory training course or to have comparable knowledge.

General

Our training courses are scheduled several times a year. Go to www.verebus.nl/training for our current training calendar or to request a (tailor-made) training course. Or send us an email at academy@verebus.nl.

Leading in Knowledge

The most important asset of Verebus Engineering is the expertise and know-how of our employees. In order to reinforce this unique position, we set up the Verebus Academy to share this relevant and up-to-date knowledge with our clients.

Whether you're looking for a workshop, short training, or longer course. The Verebus Academy is the training partner in the field of ILS, S-specifications, technical documentation and RCM.

Your operation
and maintenance
efficient,
easy & safe

More information? www.verebus.nl/training or academy@verebus.nl

Verebus is a technical service provider with knowledge and experience in the field of asset management and associated documentation services. For owners of complex assets, or their suppliers, we can design the entire maintenance and operation philosophy and provide documentation and instruction.

We make maintenance and operations **efficient** in terms of functionality and money, **easy** through logical and clear instructions and **safe** through correct and understandable information.

You can call on us in all phases of the life cycle of your systems and installations. We are independent and cooperate where necessary with complementary partners on a project basis, tailored to your needs.
